## PROF. JOS. PETERSON TO SPEAK AT CLUB MEETING

The meeting of the Sunday Night club, in the Guild hall of the Church of the Good Shepherd, tomorrow evening, promises to be one of the most interesting in the entire course. Probably no two words are receiving more thought and attention in our day than the words "Hereditry" and "Environment," and Professor Joseph Peterson, who occupies the chair of psychology in the University of Utah, is to speak on the subject of "The Effect of Environment Upon Hereditary Traits."

Professor Peterson is recognized as one of the ablest scholars in the state. The meeting, which is open to the public, will begin at 7:30 and there will be an opportunity for a general discussion of the subject at the close.

of the address. The speaker next Sunday night will be the Hon. Morris L. Ritchie, judge of the Third district court of Utah. Judge Ritchie will deal with the relationship between the new scientific learning and the historic faith of Christendom.

## ILLUSTRATED SERMON AT M. E. CHURCH

The importance of the Bible as a power toward the moral uplift of the race, was noted in a strong article in Collier's Weekly. That a book so important as the Bible should have been preserved by the special watch care of a superintending providence, seems but natural and how the Bible has triumphed through many fierce persecutions will be shown by beautiful and striking views in the First M. E. church, Sunday evening.

The illustrated hymns Rocks of Ages and From Greenland's Icy Mountains are unusually beautiful. This will be the last of the series.

## WHY BELIEVE IN THE VIRGIN BIRTH

The two most important and most disputed facts in the life of Christ are the teaching of "The Virgin Birth" and the "Resurrection."

Christmas speaks of the Virgin birth. The reason for believing in the Virgin birth and the Bible story of the divine Christ will be the theme Sunday night in First Presbyterian church.

### CURE FOR DEAFNESS.

Chicago, Dec. 13.—If you want to ward off deafness, was your ears and make faces. This is the advice given by the French physician, Fernet, in

an article in the current number of the journal of the medical association. According to the article, the making of faces and the wiggling of ears exercises the eustachian tube and helps to prevent a loss of the hearing.

## AUTHENTICITY OF THE MONA LISA PROVED

Florence, Italy, Dec. 13.—The authenticity of the "Mona Lisa" found yesterday in possession of Vincenzo Perugia, was confirmed by experts after further examination today.

The picture bears the seals of the Leuvre and other galleries in which it has been hung, while the traces of repairs at the back of the canvas known to have been made are also visible.

The prisoner was again questioned by the police authorities this morning. He repeated his story of having stolen the picture as an act of patriotic vengeance for Napoleon's deportation in Italy. He displayed the utmost indignation at his treatment by the police, declaring it unjust after the risks he had run and the abnegation he had demonstrated out of patriotic sentiment.

A number of prominent Italians have written the Italian minister of public instruction requesting him to permit the exhibition of "Mona Lisa" in Florence, its former home, before returning it to the French government.

W. Watson, Unionist, 4,257.  
G. Morton, Liberal, 4,006.  
Mr. Gibb, Labor, 1,574.

The Liberals claim the result is an endorsement of the government's Irish policy, as the Liberal and Labor candidates are both home rulers and together polled 1,400 votes more than the Unionists.
